

Postgraduate Certificate Course in Occupational Health 2006

(AFIH -Associate Fellow in Industrial Health)

**Accredited by Director General of Factory Advisory Services and Labour Institute
Ministry of Labour, Government of India**

National Model Centre for Occupational Health Services

Bharat Heavy Electricals Limited

Tiruchirappalli - 620 014

The National Model Centre for Occupational Health Services, BHEL, Tiruchirappalli (an ILO / UNDP / Government of India project) has been a pioneer in the establishment of occupational health services at the place of employment. In its more than 30 years of existence, the Model Centre has passed on the expertise to many industries in India and has equipped many medical professionals in industries with the knowledge of occupational health.

The National Model Centre for OHS has an array of functional units of international excellence in occupational hygiene, occupational toxicology, occupational pulmonology, occupational medicine, etc.

The laboratories in these functional units have been equipped with the latest state-of-the-art technology. The instruments are constantly updated to suit the industry's requirements.

The Model Centre's professional staff are well qualified and have been trained as ILO Fellows in various disciplines of occupational health in Europe and America.

The Centre has a rich in-house experience in epidemiology, industrial hygiene, ergonomics, etc., based on Indian conditions.

The AFIH course is approved by the Central Labour Institute and the examination will be conducted by them and certificates will be issued by DGFASLI.

This is the first instance of an industry-based course in occupational health in India, conducted exclusively by well experienced faculty who have been involved in running OHS at the place of employment for more than 30 years.

Course Content:

Theoretical inputs will cover the following areas:

Occupational health, occupational medicine, health promotion, health screening, toxicology, ergonomics, occupational physiology, psycho-social factors in industry, psychological guidance and counselling, legislations in occupational health, communications, productivity and occupational health, training programmes and health education, health information systems, ILO radiographs of pneumoconiosis, occupational diseases causation, clinical features, diagnosis and prevention and surveillance of work

environment using industrial hygiene methods.

Practicals will involve carrying out health screening procedures such as vision screening, spirometry, conducting field studies in industrial hygiene, toxicological experiments, etc.

Project work at work place will be required to be carried out and at the end of the programme candidates will be required to make a presentation on the same.

Industrial visits to important sectors in chemical, coal, oil refining, tanning, fabrication and paper manufacturing will be an important part of the curriculum.

Eminent faculties in occupational health and allied areas handling the classes will be an added advantage of this programme.

Eligibility for Admission:

1. MBBS Degree from an Institution recognised by the Medical Council of India.
2. Completion of Internship.
3. Permanent Registration with the State Medical Council/Medical Council of India.
4. Minimum one year experience in Industry/Occupational health related work or 2 years in general practice after completion of internship.

Admission Process:
