Nuclear war games: India

Former national security advisor Shishankar Menon’s book has stirred up a debate

The debate over India’s nuclear doctrine, which was first formulated in 1999 and revised in 2003, has centred mainly on whether India should abandon its doctrinal commitment of “no first use” - the undertaking not to use nuclear weapons unless India were attacked with weapons of mass destruction - and the credibility of the so-called “massive retaliation”. But now, after former national security advisor Shivshankar Menon hinted strongly in his recent book that India could, in certain circumstances, launch preemptive nuclear strikes to knock out Pakistan’s nuclear arsenal, there is a noisy debate on the doctrine.

The ramifications of the official doctrine, which was formulated at a time of vulnerability when New Delhi was counting post-nuclear-test sanctions from responsible behaviour. These Indian strategists argue, somewhat unconvincingly, that Menon has said nothing new.

Each side believes the other has an agenda. The status-quoists (mostly Indians) say the argument that Menon has expanded nuclear strike options is alarmist and aims at creating grounds for non-proliferation activists to curb India. Those who see Menon’s views as path-breaking think that denial of more pro-active Indian nuclear posture stems from the fear that more Nuclear Suppliers Group members might be alarmed into opposing.
