BHEL/Trichy is looking for Retrofitting of New PLC in CH6-Tube Bending Machine, as per the technical specification. The vendors fulfilling the pre-Qualification Criteria alone need to apply and shall be considered.

Pre-Qualifying criteria for participating vendors are given below:

1. Only those vendors who have supplied and commissioned similar or higher capacity/size equipment that is working satisfactorily for atleast one year after commissioning should quote.

2. Information about the customers to whom similar equipment's have been supplied is to be submitted for qualification of the offer.

3.Before placing the order, BHEL team will visit the supplier works and also evaluate the places where the vendor has supplied similar equipment's.

BHEL commercial terms & conditions with Price Bid format and Bank Gurantee formats can be downloaded from BHEL web site <u>http://www.bhelcom</u> or from the Government tender website <u>http://tenders.gov.in</u> (public sector units) Bharath Heavy Electricals Limited) under enquiry reference "2680900016"

	Existing Electrical system	Existing electrical control is built with relay logic for achieving the pipe bending process. The bending angles are achieved through a drum controller type limit adjusting angle control system through electrical.		
		All the contactors are with #no volt coil# voltage of 220V AC supply and the hydraulic power pack motor is 3 phase, 415 Volts, 50 Hz AC supply. The solenoids used for controlling the directional control (hydraulic) valves are of 24 Volts DC supply. A pedestal type (with moving castor wheels) operator control desk having push button switches, selector switches and indication lamps are used for the pipe bending operations. The motor used for hydraulic power pack is 9 kW, 1460 RPM, 3 phase 415 Volts 50 Hz AC supply.		
		There are approximately 18 push button switches , 19 limit switches, 3 selector switches, 29 control relays / contactors, 18 solenoids, 12 indication lamps available on the machine.
